2

## Structure of the Talk

1. WikiTalk Open-Domain Dialogues
2. Dialogue Coherence and Information Structure
3. Constructive Dialogue Modelling
4. Multimodal Discourse Structure Marking

15/12/2012

COLING ADACA 2012, Mumbai

3

## Background

- Discourse outside the sentence and outside the text, to the three-dimensional world: situated dialogues
- Human-human communication, human-robot interactions

15/12/2012

COLING ADACA 2012, Mumbai

4

## Video about WikiTalk

15/12/2012

COLING ADACA 2012, Mumbai

5

## Open-Domain Dialogues

- Example: Talking about Shakespeare
  - Using information from the web
  - Wikipedia articles on any topic
- If the topic can be identified:
  - Get Wikipedia article about Shakespeare
  - Start reading out the first paragraph
- Questions:
  - How to continue the conversation?
  - How to switch topics?

15/12/2012

COLING ADACA 2012, Mumbai

6

## Structure of the Talk

1. WikiTalk Open-Domain Dialogues
2. Dialogue Coherence and Information Structure
3. Constructive Dialogue Modelling
4. Multimodal Discourse Structure Marking

15/12/2012

COLING ADACA 2012, Mumbai

7

## Discourse vs. information structure: terminology

- Theme vs. Rheme
- Topic vs. Comment
- Topic vs. Focus
- Ground vs. Focus
- Presupposition vs. Focus
- Background vs. Focus
- Contextually bound vs. nonbound
- Given vs. New

Relations and developments, see Steedman and Kruijff-Korbayová 2001

15/12/2012

COLING ADACA 2012, Mumbai

8

## Coherence

Grosz & Sidner (1986)

- Global coherence:
  - Constrains the whole dialogue structure
  - Discourse segment purposes: dominance hierarchy, satisfaction precedence
- Local coherence:
  - Speaker's center of attention shifts over two consecutive utterances
  - Centering: anaphoric references (Grosz, Joshi & Weinstein 1983,1995; Walker et al. 1994; Strube & Hahn 1999)

15/12/2012

COLING ADACA 2012, Mumbai

9

## Coherence and more...

- Coherence relations
  - RST (Mann & Thompson 1988)
  - Discourse relations (PDTB, Prasad et al. 2008)
- Coherence is a deeper notion than discourse just being a set of entities (Hobbs 1979)
  - ?? John goes to Istanbul. He likes spinach.
  - Speaker's need to be understood
- Topical coherence not based on shared reference across utterances (Levinson 1983)
  - Overall topic of a dialogue is agreed as the conversation goes on: "constructed across turns by the collaboration of participants"

15/12/2012

COLING ADACA 2012, Mumbai

10

## Information Structure

- Halliday, The Prague School, Vallduví, ...
- Topic and comment
  - What is talked about vs. what is said about it
  - Already grounded
- NewInfo (focus) and background
  - Newsy, informative vs. old, known or expected
  - Related to accentuation of words
    - Old ≈ deaccentuated
    - New ≈ sentential nuclear stress
- Focus
  - John only introduced Mary to Sue
  - John only introduced Mary to Sue

15/12/2012

COLING ADACA 2012, Mumbai

11

## Topic and NewInfo in Questions

- What about Shakespeare? What can you tell about him?

<i>Shakespeare</i>	<i>was born and raised in Stratford-upon-Avon</i>
Topic	Comment
Old (background)	NewInfo

- What about Shakespeare? Where was he born and raised?

<i>Shakespeare</i>	<i>was born and raised</i>	<i>in Stratford-upon-Avon</i>
Topic	Comment	
Old (background)	NewInfo	

15/12/2012

COLING ADACA 2012, Mumbai

12

## Other Approaches

- Prosody and Information Structure
  - Hirschberg, Nakatani, Swerts, Krahmer, Steedman,...
- Multimodal structuring using gestures and gaze
  - Story telling using all modality channels

15/12/2012

COLING ADACA 2012, Mumbai

13

## Structure of the Talk

1. WikiTalk Open-Domain Dialogues
2. Dialogue Coherence and Information Structure
3. Constructive Dialogue Modelling
4. Multimodal Discourse Structure Marking

15/12/2012

COLING ADACA 2012, Mumbai

14

## Information Flow in Dialogues

- Question-answering – what is new  
S: Please select a topic. *What* would you like to *hear about*?  
U: [I'd like to hear about] *Shakespeare*.
- Information giving in context = topic introduction  
– There are a few favorites I can talk about, for instance, I can talk about *Metz, France, Finland, Manchester United, Rablais,...*
- Implicit Confirmations – continue dialogue  
– Please select from: *Elephant, Elephant Video, Elephant & Castle,...*?
- Explicit Confirmations – make sure topic is understood  
– *Did you mean "enough"?*
- Acknowledgements of presentation and interruptions  
N: Shakespeare was an English poet and playwright, widely regarded as the greatest...  
S: *uhuh* *yeah*  
  
S: Stop [tap on the head to interrupt the presentation]  
N: *oh, sorry*, what would you like to do?  
S: *alphabet...*

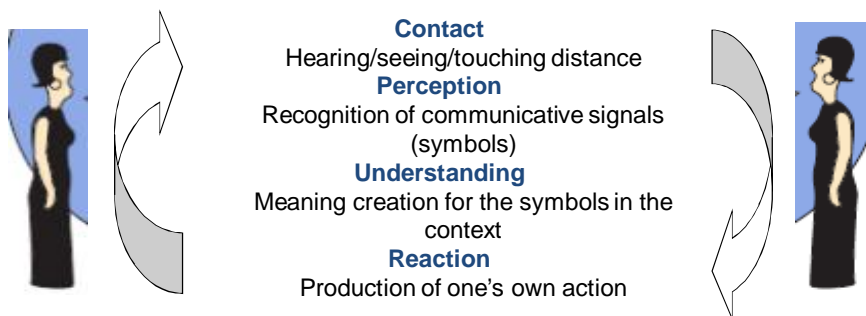

15/12/2012

COLING ADACA 2012, Mumbai

15

## Constructive Dialogue Modelling

- Rational agents coordinate their actions, monitor each other and the environment
- React to the situation according their beliefs, intentions, and understanding
- Construct shared knowledge to achieve a goal, maintain social bonds (Allwood, 1976; Jokinen 1996, 2009)
- Multimodal signalling of basic enablements: gesturing, eye gaze, body posture
- Cooperation, synchrony

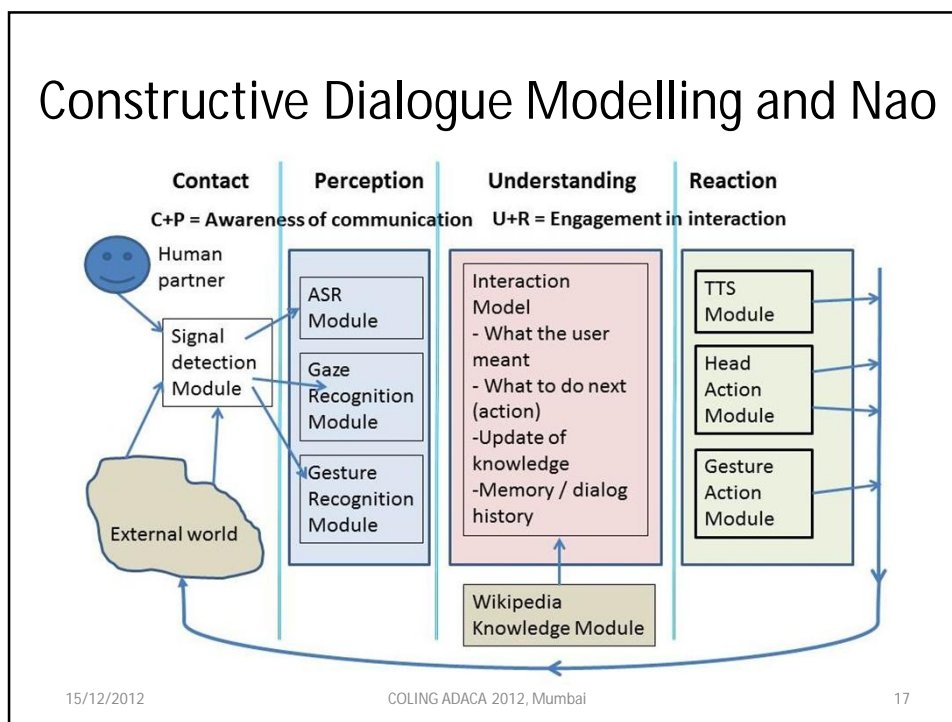

15/12/2012

COLING ADACA 2012, Mumbai

16

## CDM: Coherence and Communication

- Dialogue coherence is a sign of the speakers' cooperation with each other:
  - Discourse topics are co-created in the interaction
  - Difference between the processes of identification and recognition of topics operating on local vs. global coherence
- Distinction between
  - Thematic information structure "aboutness"
    - topical vs. non-topical discourse referents, or 'what the contribution is about' vs. 'what is in the background',
  - Attentional structure "newness"
    - influential status of discourse referents on the hearer's cognition, or 'what is new' vs. 'what is old information'

## WikiTalk: Coherent Continuation

- Split text into chunks
  - Speak a chunk, pause for feedback
- Is the human interested or not?
  - If human seems interested, continue same topic, next chunk
- Discourse coherence already taken care of by the Wikipedia article writers!

15/12/2012

COLING ADACA 2012, Mumbai

19

## How to continue?

- After each sentence
  - pause a while
  - small nod to elicit feedback from the user
  - If no reaction, continue
- After each paragraph
  - Longer pause
  - Possibly explicit feedback elicitation
- Feedback may be non-verbal
  - Eye gaze (looking at robot)
  - Facial expression
  - Body language (coming closer)

**William Shakespeare**

From Wikipedia, the free encyclopedia  
(Redirected from Shakespeare)

*This article is about the poet and playwright. For other persons of the same name, see William Shakespeare (disambiguation). For other uses of "Shakespeare", see Shakespeare (disambiguation).*

**William Shakespeare** (baptised 26 April 1564; died 23 April 1616)<sup>[nb 1]</sup> was an English poet and playwright, widely regarded as the greatest writer in the English language and the world's pre-eminent dramatist.<sup>[1]</sup> He is often called England's national poet and the "Bard of Avon".<sup>[2]</sup><sup>[nb 2]</sup> His surviving works, including some collaborations, consist of about 38 plays,<sup>[nb 3]</sup> 154 sonnets, two long narrative poems, and several other poems. His plays have been translated into every major living language and are performed more often than those of any other playwright.<sup>[3]</sup>

Shakespeare was born and raised in Stratford-upon-Avon. At the age of 18, he married Anne Hathaway, with whom he had three children: Susanna, and twins Hamnet and Judith. Between 1585 and 1592, he began a successful career in London as an actor, writer, and part owner of a playing company called the Lord Chamberlain's Men, later known as the King's Men. He appears to have retired to Stratford around 1613, where he died three years later. Few records of Shakespeare's private life survive, and there has been considerable speculation about such matters as his physical appearance, sexuality, religious beliefs, and whether the works attributed to him were written by others.<sup>[4]</sup>

Shakespeare produced most of his known work between 1589 and 1613.<sup>[5]</sup><sup>[nb 4]</sup> His early plays were mainly comedies and histories, genres he raised to the peak of sophistication and artistry by the end of the 16th century. He then wrote mainly tragedies until about 1608, including *Hamlet*, *King Lear*, *Othello*, and *Macbeth*, considered some of the finest works in the English language. In his last phase, he wrote tragicomedies, also known as romances, and collaborated with other playwrights.

**William Shakespeare**

The Chandos portrait, artist and authenticity unconfirmed. National Portrait Gallery, London.

<b>Born</b>	Baptised 26 April 1564 (birth date unknown)
	Stratford-upon-Avon

**William Shakespeare** (baptised 26 April 1564; died 23 April 1616)<sup>[nb 1]</sup> was an English poet and playwright, widely regarded as the greatest writer in the English language and the world's pre-eminent dramatist.<sup>[1]</sup> He is often called England's national poet and the "Bard of Avon".<sup>[2]</sup><sup>[nb 2]</sup> His surviving works, including some collaborations, consist of about 38 plays,<sup>[nb 3]</sup> 154 sonnets, two long narrative poems, and several other poems. His plays have been translated into every major living language and are performed more often than those of any other playwright.<sup>[3]</sup>

Shakespeare was born and raised in Stratford-upon-Avon. At the age of 18, he married Anne Hathaway, with whom he had three children: Susanna, and twins Hamnet and Judith. Between 1585 and 1592, he began a successful career in London as an actor, writer, and part owner of a playing company called the Lord Chamberlain's Men, later known as the King's Men. He appears to have retired to Stratford around 1613, where he died three years later. Few records of Shakespeare's private life survive, and there has been considerable speculation about such matters as his physical appearance, sexuality, religious beliefs, and whether the works attributed to him were written by others.<sup>[4]</sup>

Shakespeare produced most of his known work between 1589 and 1613.<sup>[5]</sup><sup>[nb 4]</sup> His early plays were mainly comedies and histories, genres he raised to the peak of sophistication and artistry by the end of the 16th century. He then wrote mainly tragedies until about 1608, including *Hamlet*, *King Lear*, *Othello*, and *Macbeth*, considered some of the finest works in the English language. In his last phase, he wrote tragicomedies, also known as romances, and collaborated with other playwrights.

## Sentential Subjects as Recurrent Topics

- Sentential subjects encode the recurrent topic either directly or indirectly (lexical reiteration, etc.)
  - Occur in the discourse thematic position to start the text
  - Other sentential topics are presented as hierarchically subordinate to it
- ⇒ Co-construction of the global discourse topic through the discourse

15/12/2012

COLING ADACA 2012, Mumbai

23

## Lexico-referential Topic Construction

- William Shakespeare – an English poet and playwright – English language
- He – national poet
- His surviving works – 38 plays, 154 sonnets, two long narrative poems
- His plays – [translated, performed]
- Shakespeare – Stratford-on-Avon
- He – Anne Hathaway, Susanna, Hamnet, Judith
- He – London, playing company, Lord Chamberlain's Men, King's Men
- He – [retired]
- He – [died]
- Few records of Shakespeare's private life – [survive]
- There – his physical appearance, sexuality, religious beliefs,
- The works attributed to him – written by others
- Shakespeare – [produced]
- His early plays – comedies, histories
- He – tragedies, Hamlet, King Lear, Othello, Macbeth
- He – tragicomedies

15/12/2012

COLING ADACA 2012, Mumbai

24

## Switching Topics

- Dialogue, not monologue
  - Don't read out entire article
  - Would be irritating (need "talk less!")
- Hypertext links
  - Links identify possible topic shifts
  - Topic navigation by clicking on links
  - Clicking shows human's positive interest

15/12/2012

COLING ADACA 2012, Mumbai

25

## Topic Chains

- Hyperlinks -> NewInfos -> topic shifts
  - Robot: "Shakespeare was born and raised in [Stratford-upon-Avon](#)" (NewInfo)
  - Human: "Stratford-upon-Avon?" (topic shift)
  - Robot: "Stratford-upon-Avon is a [market town](#) and [civil parish](#) in [Warwickshire](#), [England](#)"
  - Human: "Warwickshire?" (topic shift)

15/12/2012

COLING ADACA 2012, Mumbai

26

## How to Switch Topics

- Echoing
  - May show human didn't hear clearly
  - "Hamnet?" (... or was it "Hamlet"?)
- Topic shift anyway
  - Download new article
  - "Hamnet Shakespeare"
  - Start speaking first chunk

15/12/2012

COLING ADACA 2012, Mumbai

27

## Topic trees

- McCoy & Cheng (1991), Jokinen & al. (1998), Jokinen & Wilcock (2003)
- Originally "focus trees", to trace foci in NLG systems
- Branches describe what sort of shifts are cognitively easy to process, and can be expected to occur
  - Constrain possible continuations ("what can be said next")
  - Narrow down the relevant facts, i.e. the part of the knowledge that is to be included in the response
- Random jumps are not very likely, incoherent continuations to be marked with a special marker (*by the way, and then, to go back to*)

15/12/2012

COLING ADACA 2012, Mumbai

28

## Topic shifts

- Topics are not changed arbitrarily
  - Continue: direct link between NewInfo and current Topic
  - Shift: inference link between NewInfo and Topic
  - Change: no obvious link between NewInfo and Topic
- Smooth shifts
  - Based on World model –relations (e.g. from actors to event, from objects to properties, etc.)
- Awkward shift
  - To be marked appropriately

15/12/2012

COLING ADACA 2012, Mumbai

29

## How to Introduce a Brand-New Topic?

- Quite Difficult!
  - Open vocabulary speech recognition?
  - Basically, this doesn't work
- User spells the Topic
  - "S", "H", "A", "K", ...
  - "Sierra", "Hotel", "Alpha", "Kilo", ...
  - Wikipedia helps if first few letters known

15/12/2012

COLING ADACA 2012, Mumbai

30

## Structure of the Talk

1. WikiTalk Open-Domain Dialogues
2. Dialogue Coherence and Information Structure
3. Constructive Dialogue Modelling
4. Multimodal Discourse Structure Marking

15/12/2012

COLING ADACA 2012, Mumbai

31

## Multimodal Discourse Marking

- How to express the discourse relations in spoken presentation?
- Holistic communication view
  - Synchrony and coordination of modalities
  - Used in an unintrusive way
- Modality = refers to senses employed to process incoming information (vision, audition, olfaction, touch, taste)
- Human „embodied“ communication
  - Interpersonal relationship
  - Affective information
  - Coordination of interaction

15/12/2012

COLING ADACA 2012, Mumbai

32

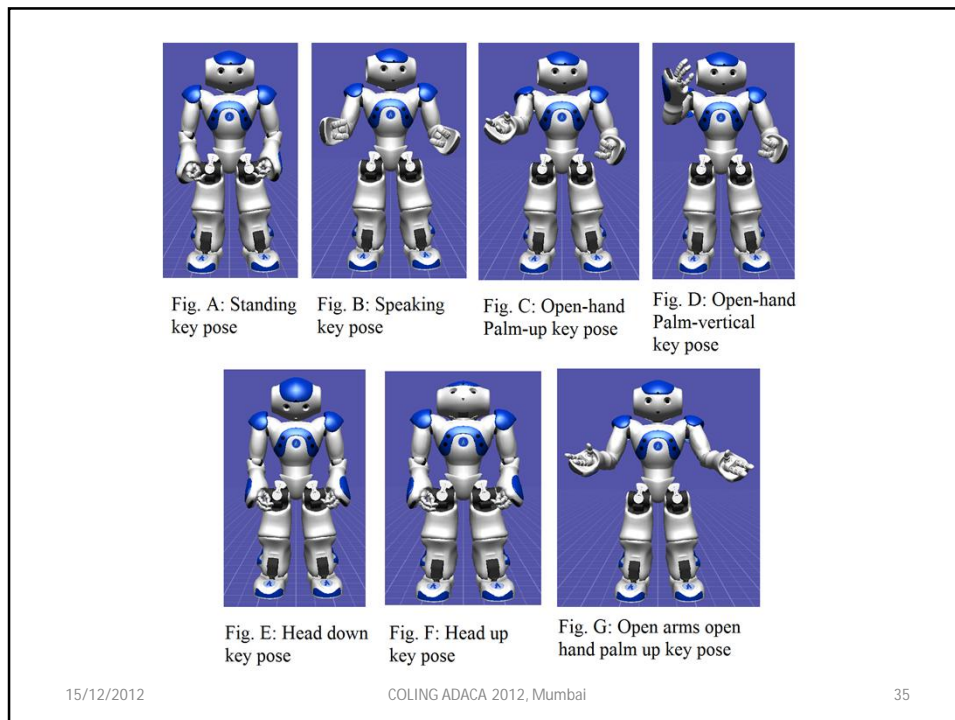

Technologies	WikiTalk Behaviour (demo video)
WikiTalk	<ul style="list-style-type: none"> <li>– Knowledge from Wikipedia</li> <li>– Segmentation of articles into paragraphs, sentences, and NewInfos</li> </ul>
Face recognition	<ul style="list-style-type: none"> <li>– Recognition of an object in the vision field</li> <li>– If human face, start to follow</li> <li>– Recognition of human contact and interest</li> </ul>
Gesturing	<ol style="list-style-type: none"> <li>1) User command gestures (“Stop!”)</li> <li>2) Nao’s communicative gestures: <ul style="list-style-type: none"> <li>– Presentation of information with palm-up</li> <li>– Elicit of user feedback with nod down</li> <li>– Surprise at interruption with nod up</li> <li>– Emphasis of NewInfo by a beat</li> </ul> </li> </ol>
Dialogue management	<ul style="list-style-type: none"> <li>– Start a conversation</li> <li>– Continue with the same topic</li> <li>– Change to a new topic</li> <li>– Stop a conversation</li> </ul>

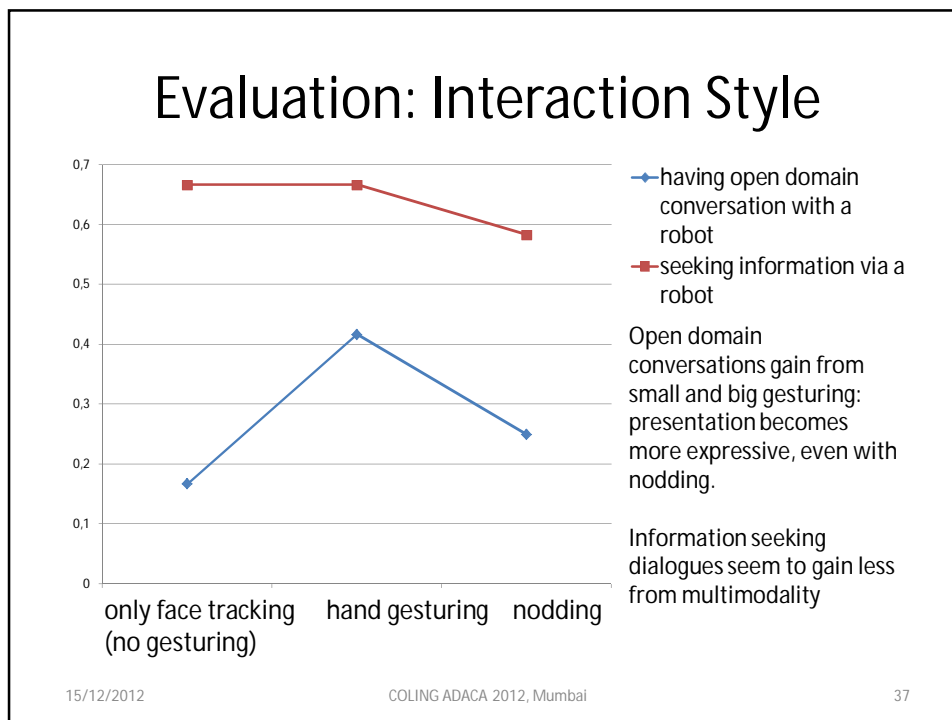

## Gesture families

- Form – function
- Kendon (1980): Similar gesture forms have their own *semantic theme* -> Gesture families
- Open Hand Prone (Palm vertical)
  - express in general stopping or halting of an action (own or other)
- Open Hand Supine (Palm horizontal)
  - express general offering and giving of ideas and concepts
- Index Finger Extended (pointing gestures)
  - same as those in the Open Hand families but the gestures are precise and explicit

## Other gesturing

- Head Movement
  - Head-Repetition: single or repeated movement
  - Nod-up, nod-down, jerks
  - Head forward/backward,
  - Tilt sideways, turn to partner, side-turn, shake, waggle, other
  - Feedback, turn management, sequencing
- Body Movement
  - Body-Direction w r t partner: Forward, backward, sideways
  - Body and feet movement
  - Movement up, down, partnerside, towardsPartner
- See the COLING-2012 paper

## Conclusions and Future work

- Presentation of Wikipedia articles in an interactive manner
  - Navigation and reference to articles
  - Topic management: continuation of a topic, shifting to a new one
  - Co-construction of the global topic (recurrent topics)
- Multimodal Discourse Marking by gestures and body movement
  - Story telling in literary studies
  - Expressive gesturing
- Further studies
  - Multimodal relations, iconic verbs, timing, etc.
  - Presenting and tailoring information to the user
  - Cultural differences

Thank you!

15/12/2012

COLING ADACA 2012, Mumbai
