

Books published by ÚFAL

Michal Novák

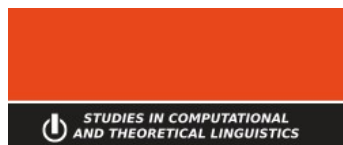

<https://ufal.mff.cuni.cz/books>

ÚFAL publishing house

- aimed at publishing monographs related to topics in (computational) linguistics
 - monographs usually promised as an output of grants
- from this year on, we no longer publish scientific outputs (those you could report to RIV)
 - use other publishers instead (e.g. Karolinum)
- most of the books are a part of the Studies in Computational and Theoretical Linguistics series (SCTL; “orange books”)
- Jan Hajič (head), Michal Novák, Pavel Straňák, Květoslava Králiková

Published in 2020-21

HIDDEN IN THE LAYERS
Interpretation of Neural Networks
for Natural Language Processing

David Mareček, Jindřich Libovický, Tomáš Musil,
Rudolf Rosa, Tomasz Limisiewicz

Workflow of the publishing house

Sales

Karolinum bookstore

Donations at events organized by ÚFAL

- ~100 books a year (before COVID)
- last event: MT Marathon 2022
 - 35 books donated

Suggestions for authors

- use our the LaTeX template for SCTL books
 - <https://wiki.ufal.ms.mff.cuni.cz/tex:sctl>
- tell us that you plan publishing the book at least 6 months before the deadline
- think carefully about the number of copies (100-150)
- take care of distributing your books
 - colleagues from abroad, conferences, friends, family

Suggestions for others

- please inform me whenever you organize an offline event with external participants
