

Hello!  
Sorry for not being here in person

My name is Jana Straková

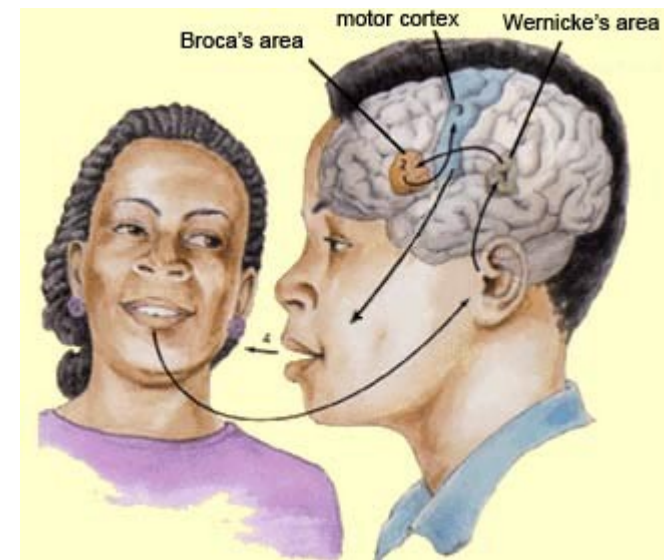

I'm a graduate student  
at Institute of Formal and Applied  
Linguistics

I would like to invite you to the talk  
Language and Cognitive Neuroscience  
which is my thesis topic

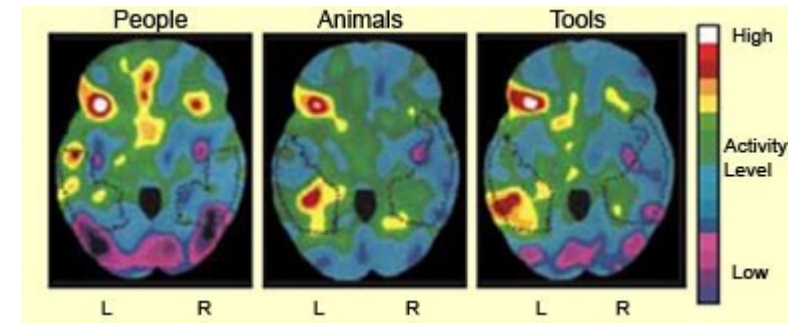

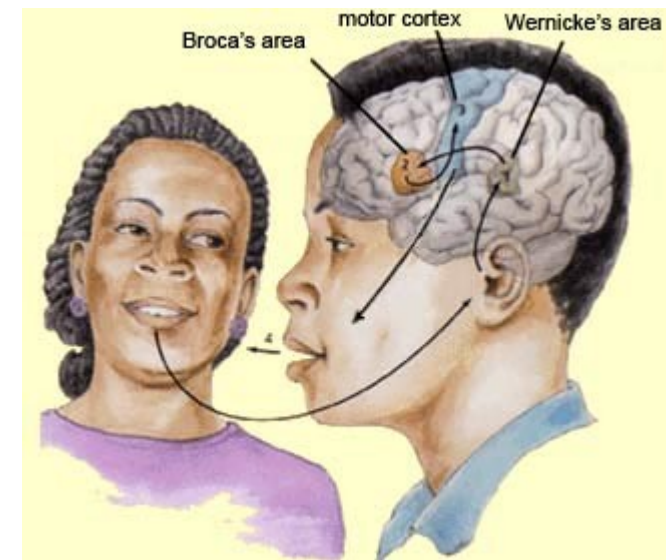

# You will hear:

- how neurolinguistic models of language in the human brain developed

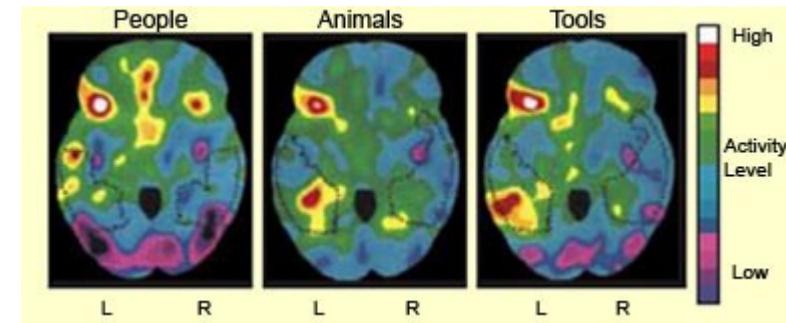

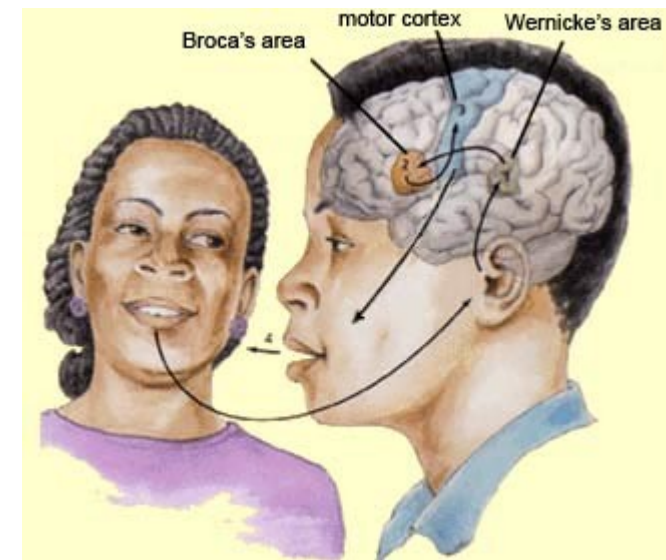

# You will hear:

- how neurolinguistic models of language in the human brain developed
- a few fine examples of current research in the field of cognitive neuroscience in language

# You will hear:

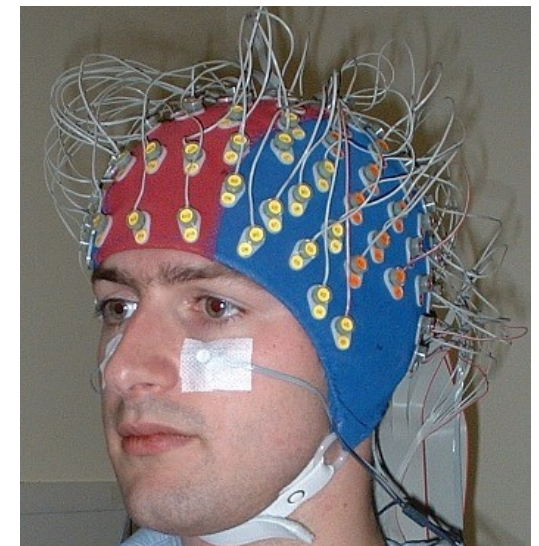

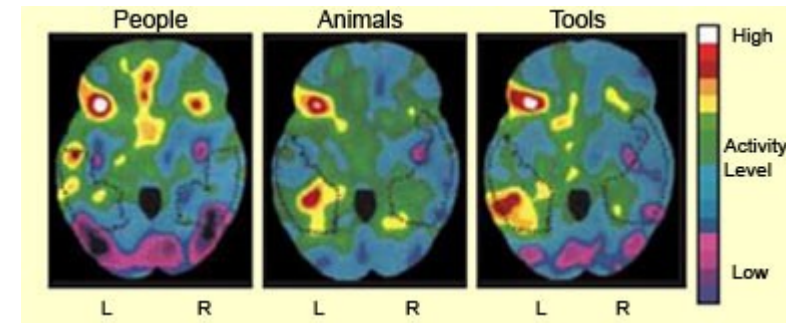

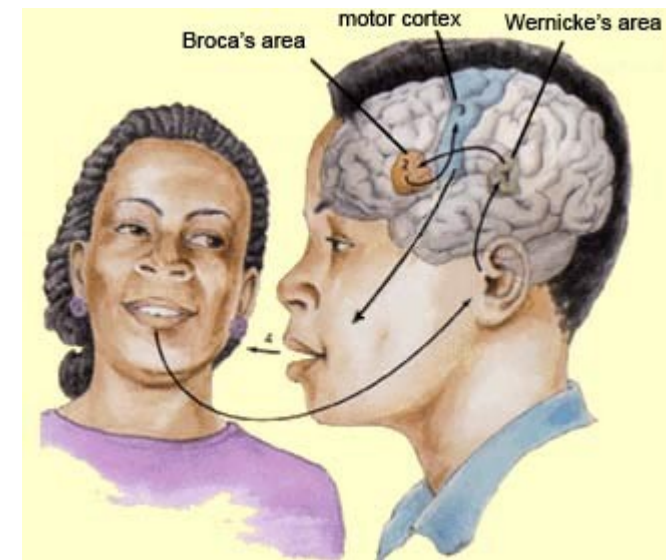

- how neurolinguistic models of language in the human brain developed
- a few fine examples of current research in the field of cognitive neuroscience in language
- something about neuroscientific and behavioral measures, such as:
- scalp-recorded event-related potentials (ERPs)

# You will hear:

- how neurolinguistic models of language in the human brain developed
- a few fine examples of current research in the field of cognitive neuroscience in language
- something about neuroscientific and behavioral measures, such as:
- scalp-recorded event-related potentials (ERPs)
- functional magnetic resonance (fMRI)

See you on Tuesday, 14<sup>th</sup> 9:00
