Where to Find Bibliometrics

- Web of Science – Clarivate Analytics
 - Formerly Thomson Reuters
 - <https://apps.webofknowledge.com>
- Scopus
 - <https://www.scopus.com/freelookup/form/author.uri>
- **Google Scholar**
 - <https://scholar.google.com>
 - Harzing's Publish or Perish (Windows client)
- Biblio, OBD (UK)
 - https://verso.is.cuni.cz/fcgi/verso.fpl/fname/obd_public/
- RIV
 - <https://www.rvvi.cz/riv>
- Biblio UFAL
 - Static: <https://ufal.mff.cuni.cz/biblio>
 - For entering your publications: <http://10.10.24.239:8080/biblio/?section=publications>
 - Only through VPN or if at work (MS UFAL network)

!!! Caveats !!!

- All the numbers you will see are ... just numbers!!
- They
 - Do not reflect actual participation on multi-authored publications
 - some publications are overview papers / encyclopedia articles / datasets with 200+ authors
 - Google might have suddenly discovered / “forgotten” / never found (even a highly cited) publication (important factor for y/y differences)
 - everyone has a big increase in 2020!! (Especially in SSH ... not clear why)
 - It only reflects reality (hopefully...) when comparing high numbers (error in say +-2 publications/citations does not affect 100s, but it does affect single digit numbers)
 - In terms of evaluation of employees, they are only 1 element of 3 (alongside with teaching and service/management); i.e. some people currently on leave, in service (management, university or international committees, boards etc), might have lower numbers here, but evaluate very well in the end
- But
 - We should not ignore bibliometrics altogether: RIV(?), projects, CVs, etc.
- For 2020, I left out those who do not have public profile at Google Scholar
