Admin - Vacations in PAKT

- You might be confused with different numbers in PAKT and CIS (= Verso https://cis.mff.cuni.cz/)
    - maybe CIS has a delay, maybe PAKT is wrong
- You might be confused with the number of days you are supposed to use up
    - e.g. 2.4 days available
    - **Briefly:** round the number up (i.e. 3) and then plan the given number of days in PAKT
- We will compare PAKT and HR department data this week and inform you how many days you have to use up in Dec (if any)

Admin - Vacations in PAKT

Not so briefly

In PAKT, we plan our vacation with days (= integers). However, the Czech Labour Code operates with weekly working hours, so the annual leave needs to be calculated also in hours. Calculation of your annual leave depends on

- whether you are an (non) academic employee

- what is your involvement (full time, part time)

- if there are changes in your involvement over the year

  (= the most exciting scenario)

Admin - Vacations in PAKT

In great detail

- ○ See [Annual Leave: How it works](#) by Stáňa Gráf
- ○ We're currently considering whether to implement a complete vacation calculator in PAKT. We were informed that the Dean's Office will launch an HR system in spring 2023. So we certainly don't want to duplicate work (in other words, waste our time and money).

Admin - the Office operation

Please, talk to Mrs. Iva Doušová about any agenda that requires cooperation of the Office. Even about the agenda that you have opened with Mrs. Brdičková. Mrs. Doušová will resolve it with Mrs. Brdičková.
